

BUILDING ENVELOPE CONSULTANTS

Stone & Glazing Consulting, a nationally recognized exterior wall consulting firm located in Lewisville, Texas, is seeking experienced Architects/Engineers/Consultants to perform investigations, testing, remediation design, and project management.

Primary Responsibilities:

- Represent the Owner by observing and documenting the progress and quality of the work being performed by contractors.
- Facilitate communication between the Owner and Remediation Contractor.
- Assist in the administration of construction contracts to ensure compliance with approved plans and specifications.
- Prepare/assist in the preparation of surveys that document, evaluate, and recommend solutions for building envelope defects.
- Prepare/assist in the preparation of plans and specifications for rehabilitation of existing structures.
- Participate in development and drafting of design details.
- Prepare surveys that document, evaluate, and recommend solutions for building envelope defects.
- Provide opinions of cost for recommended repair efforts.
- Provide third-party reviews of structural plans and specifications.
- Provide contract administration services during construction to ensure compliance with plans and specifications.
- Supervise and participate in development and drafting of design details.
- Perform related duties as assigned or required to meet company goals and objectives.

Minimum Requirements:

- Five (5) years experience in commercial construction or consulting administration, construction project management, or construction project representation
- Bachelor's Degree in Architecture, Engineering or related field
- Excellent communication, computer, writing, and technical report preparation skills
- Ability to work on roofs and building facades from swing stage equipment

Preferred Requirements:

- Experience with building rehabilitation and waterproofing systems
- Experience in rehabilitation of deteriorated masonry, reinforced concrete, and steel structures
- Experience with both invasive and nondestructive testing techniques
- Experience with coatings, waterproofing membranes, sealers, corrosion inhibitors
- Knowledge of AutoCAD
